

Deliver an extra layer of protection for your dash cam with THINKWARE's Heat Blocking film. Designed to block and deflect heat from windshields, the film effectively lowers the internal temperature of your dash cam to prevent overheating and ensure optimal performance.

Deflects direct sunlight and helps minimize heat transfer from windshield to dash cam's body

- Effectively lowers dash cam external temperature by few degrees Celsius
- Simple installation – stick on windshield first and place adhesive mount on top
- Compatible with Q1000
